PROFESSIONAL SUMMARY

Experienced Senior Unity Game Developer with 10+ years of expertise in 2D game development, combined with strong experience in Windows Phone Application and Xamarin cross-platform application development. Skilled in designing scalable game systems, optimizing performance, and delivering engaging gameplay experiences. Proven ability to handle full lifecycle development—from concept to deployment—across multiple platforms.

TECHNICAL SKILLS

- **Game Engine:** Unity 2D, Unity Editor Tools
- **Programming:** C#, OOP, Design Patterns, MVC, Scriptable Objects
- **Gameplay Systems:** Physics, AI, Animations, UI/UX, Input Systems, Profiling, Optimization
- **Tools & SDKs:** Asset Bundle, AWS S3, Firebase, AdMob, Spine
- **Version Control:** Git, SVN
- **Platforms and Stores:** Google Play Store, iOS App Store, Microsoft Store, Mac Store, Samsung Galaxy Store, Amazon Appstore
- **Plugin & Platform Integration:** UWP Custom Plugin Development for Unity, iOS On-Demand Resources (ODR) with Unity
- **AI Development Tools:** Cursor, Claude Code, AI-assisted debugging & prototyping with Unity MCP

PROFESSIONAL EXPERIENCE

At : Vihaa Technologies LLP – Ahmedabad

Senior Unity Game Developer (Duration : 6+ Years)

- Developed and maintained multiple 2D mobile educational games for toddlers and kids aged 2–8, spanning learning, puzzle, creativity, and casual genres on multiple platforms.
- Designed core gameplay systems including level progression, reward mechanisms, scoring, adaptive difficulty balancing, tracing mechanics, drag-and-drop, and phonics-driven input tailored for preschool audiences.
- Optimized game performance for low-end Android devices, improving frame rate stability, reducing memory usage, and minimizing APK size for broader device accessibility.
- Implemented multi-window and split-screen support, Chrome OS compatibility with full keyboard navigation, and Android Auto support to extend game reach across multiple platforms and form factors.
- Managed complete game development lifecycle — from prototyping through deployment and post-launch updates on Google Play Store, ensuring compliance with Google Play Families Policy
- Collaborated closely with designers and artists to deliver polished, child-friendly, and engaging game experiences

Windows Phone Application Developer (Duration : 3 Years)

- Developed scalable and high-performance Windows Phone utility applications including tools such as Flashlight, Magnifying Glass, and similar everyday productivity apps.
- Implemented MVVM architecture to ensure maintainable, testable, and structured codebase across all applications.
- Designed responsive and intuitive UI compatible across various Windows Phone screen sizes and device configurations.
- Published and managed application bundles on the Microsoft Store, ensuring smooth deployment and post-launch updates

Xamarin Cross-Platform Developer (Duration : 1.5 Years)

- Developed cross-platform mobile applications using Xamarin Forms.
- Shared codebase across Android and iOS platforms to improve efficiency.
- Integrated REST APIs and handled real-time data synchronization.

EDUCATION

Master of Computer Applications (MCA), Gujarat Technological University (GTU)

FEATURED GAMES

Math Games for Elders

Worked on multiple interactive math learning games designed for children from Kindergarten (KG) to Grade 7, focused on improving mathematical understanding through gamified educational activities and engaging gameplay experiences. Contributed to the development of educational modules covering counting, number recognition, addition, subtraction, multiplication, division, fractions, decimals, percentages, exponents, factors, mixed operations, geometry, graphs, and advanced algebra concepts. The games were designed with animated tutorial, colorful animations, touch-based interactions, and child-friendly UI/UX to create an engaging and interactive learning environment for students of different age groups

Snake and Blocks

Created Snake & Blocks, a fun hybrid mobile game merging classic Snake gameplay with numbered block challenges for a more strategic and fast-paced experience. Designed various snake skins with custom animations to give the game more personality and keep progression visually rewarding. Engineered dynamic difficulty updates that automatically scale game speed, block complexity, and targets based on real-time player performance, while improving engagement through progressive challenges, score multipliers, and collectible systems.

Fruits Merge

Created Fruit Merge, a relaxing casual puzzle game where players drop and merge identical fruits to create larger ones and achieve high scores through satisfying progression. Designed and implemented the full merging system with smooth physics, collision detection, and fruit evolution from small to big to special fruits. Crafted cute animated fruit characters with expressive faces and satisfying merge animations, while building progressive gameplay with increasing difficulty, score multipliers, combo systems, special power-ups, and optimized real-time physics performance.

Kids Math: Math Games for Kids

Worked on an interactive Montessori-based math learning game designed for preschool and early-grade children to improve foundational mathematical and cognitive skills through engaging gameplay activities and child-friendly educational mechanics. The game featured multiple interactive learning modes including number tracing, counting, bead-based arithmetic, object counting, number comparison, sequence completion, matching activities, basic addition and subtraction, pattern recognition, and visual problem-solving exercises.

Kids Games: For Toddlers 3-5

Baby Phone & Kids Games is an all-in-one educational toddler app featuring the characters, designed for kids aged 1–5. The game transforms a smartphone into an interactive toy phone packed with learning and fun across multiple modes including simulated Phone Calls and Video Calls with animated characters, Tap-to-Chat with emojis and stickers, ABC & 123 Phonics Learning, Colors & Shapes recognition, Toddler Coloring activities, Vehicle Sound exploration for sensory play, Photo Frames with character overlays, a curated ad-free Toddler Video Scroll, Fireworks sensory mode, and an Object Sound Mode for audio-based learning.

Kids Games: For Toddlers 3-5

Interactive educational game designed for toddlers and preschool children aged 1–5 years, featuring multiple learning activities focused on colors, shapes, counting, memory, matching, puzzles, sorting, hand-eye coordination, and logical thinking.

Kids Toddler & Preschool Games

Interactive preschool learning game designed for toddlers and young children featuring a large collection of educational mini-games and cognitive learning activities. The game includes multiple gameplay modes such as picture puzzles, tap-and-play activities, memory games, shape matching, color sorting, shadow matching, pattern matching, ascending and descending order, big and small object comparison, odd-one-out challenges, category sorting, size sorting, counting and matching activities, color recognition, and drawing activities. These modes are designed to improve logical thinking, memory, observation skills, hand-eye coordination, problem-solving ability, and early learning concepts for kids aged 2–5 years.

Other Games

Experienced mobile game developer with hands-on experience at previous organization, contributing to a portfolio of 15+ children's educational games published on Google Play Store. Successfully worked on popular titles including **Coloring Games: Color & Paint**, **Kids Games: For Toddlers 3-5**, **Baby Games: Piano & Baby Phone**, **Math Kids: Math Games For Kids**, **Drawing Games: Draw & Color**, **Kids Multiplication Math Games**, **Baby Phone & Kids Games**, **ABC Kids – Tracing & Phonics**, **Maths Games: Math for Kids**, **Spelling & Phonics: Kids Games**, **123 Numbers – Count & Tracing**, **Puzzle Kids: Jigsaw Puzzles**, **Kids Toddler & Preschool Games**, and **Learn to Read: Kids Games**. These games target toddlers and kids aged 2–8, covering a wide range of learning categories including Mathematics, Phonics, Alphabet Tracing, Art & Coloring, Puzzles, and Early Childhood Education.
